A large area of rain moved across South Central Indiana during the evening hours. This rain fell on top of already saturated ground from previous rains. The result was numerous roads becoming covered with water. Some state highways were closed due to the high water. Rescue attempts were made in Dubois and Washington counties, with one person in Dubois county transported to an area hospital.

### KENTUCKY, Central

07 08	2100EST 1400EST			0	0	Winter Storm
----------	--------------------	--	--	---	---	--------------

A mixture of snow, sleet, and freezing rain broke out across central Kentucky late on January 7 and then changed mainly to a mix of freezing rain and sleet during the morning of January 8. The accumulation of ice on roads caused many automobile accidents. At one time, over 100 tractor trailer rigs were stranded on the Western Kentucky Parkway between Caneyville and Leitchfield in Grayson county due to the slick roads. In Hart county a state of emergency was declared that barred all travel on area roads, after 80 to 100 vehicles became stranded. Ice also brought down trees and power lines in some areas. Many areas received a quarter of an inch (0.25) or more accumulation of ice.

#### Edmonson County

Brownsville	17	2045EST			0	0			Thunderstorm Wind (50)

A large area of moderate to heavy rain moved across the area during the evening hours. This rain fell on top of already saturated ground from previous rainfall. The result was that many roads became flooded and some were impassable. Some small creeks swelled out of their banks and flooded farmland.
